Subject Index

ff – following folio(s)
L – letter

A

acanthocephalans
  as heavy metal accumulation indicators 16ff
acaricides (L) 82
acidocalcisome 443ff
acridine orange staining
  malaria speciation 423
actinosporeans
  Myxozoa taxonomy 472ff, (L) 508
AIDS
  opportunistic infections 45ff
albendazole
  broad antiparasite effectiveness 382, 384
  intestinal helminth infections 384
  lymphatic filariasis 382ff
Amblyomma variegatum
  dermatophilosis 295ff
Anaplasma marginale
  antigenic variation 283ff
  immune mechanisms 253ff, 255, 282ff
  persistent infection 283ff
  vaccine development 281ff
Anopheles gambiae
  genotyping procedures 33ff
  microsatellite markers 33ff
Anoplocephala perfoliata
  intestinal disease in horses 156ff
anthelmintic resistance
  pharmacology 141ff
antifolate antimalarials 131ff
antigen presentation
  macrophages harboring intravesicular pathogens 325ff
antigenetic diversity
  malaria 455ff
  population structure of pathogens 497ff
antimalarials, antifolate 131ff
Apicomplexa
  acidocalcisome 443ff
  apicoplast as therapeutic target 5, (L) 41
  cytoadherence 469ff
  differentiation 241ff
  life cycle 153ff
  zoite migration during infection 67ff
apicoplast
  as therapeutic target in *Toxoplasma gondii* 5ff, (L) 41
apoptosis
  Plasmodium falciparum 135
  trypanosomes 401
arachidonic acid
  in sparganosis (L) 124
arsenical–diamidine crossresistance
  trypanosomes 136ff
artemisinin
  resistance 477
Ascogregarina taiwanensis
  life cycle 153ff
autoimmunity
  Chagas disease 94ff
avermectin
  resistance 141ff

B

Babesia
  as model for cerebral malaria 492ff
  T-cell epitopes 278ff
Babesia bigemina
  blood-stage vaccines 275ff
  protective immune mechanisms 253ff, 256
Babesia bovis
  blood-stage vaccines 275ff
  protective immune mechanisms 253ff, 256
babesiosis
  cerebral *see* cerebral babesiosis
  human 93
  vaccine development 275ff
baboon
  schistosome infection model 478ff
'beaver fever' 363
bednets (L) 426
benzimidazole
  resistance 142
Biomphalaria glabrata
  schistosomiasis control 395ff
bioterrorism 427
birds
  parasites of 4ff
branching process
  Galton–Watson 159ff
brefeldin A
  Plasmodium protein export 194
Brugia malayi
  genome project 219ff, 306

C

Caenorhabditis elegans
  genome project 88ff
calcium
  homeostasis in malaria parasite 488ff
  storage, acidocalcisome 443ff
canine leishmaniasis 431
carbaryl
  resistance 2
cattle
  Theileria parva immune responses 268ff
cerebral babesiosis
  and cerebral malaria 492ff
cerebral malaria
  Babesia infections as model 492ff
  coma, NO model 459
Cestoda
  as heavy metal accumulation indicators 16
Chagas disease
  autoimmunity 94ff
  etiology 94ff
chloroquine
  integrated model of action 357ff
  resistance 360ff, 477
  uptake 360ff
clonal population structure
  Cryptosporidium parva 502ff
Coccidia, gut intraepithelial lymphocytes 483ff
coccidiosis
  zoite migration during infection 67ff
collective groups 472
Cowdria ruminantium
  protective immune mechanisms 253ff, 255, 286ff
  vaccine development 286ff, 290ff
cryptosporidiosis
  drug targets 333ff
Cryptosporidium parvum
  and AIDS 45ff
  biochemical peculiarities 333ff
  clonal population structure 502ff
  detection by nested PCR (L) 345
  drug targets 333ff
  electron transport chain 335
  folate metabolism 335
  genotyping (L) 80
  mannitol cycle 334
  plastid 336
  pyrimidine metabolism 335
  strain variation 502ff
Culex pipiens
  in London Underground 9
curriculum
  teaching parasitology in Japan (L) 40
cutaneous leishmaniasis
  human immune response 342ff
cystic echinococcosis 351ff
cysticercosis
  vaccine development 64ff
cytoadherence
  Apicomplexa 469ff
  variant surface antigens 455ff
cytokines
  Cowdria ruminantium 286ff
  inducing iNOS 458ff
  Leishmania–HIV interaction 185ff
  leishmaniasis 343ff
  tick-borne disease 257
  Toxoplasma gondii 418, 420ff
  toxoplasmosis 504ff

D

'Dapaong Tumour' 129ff
DDT
  malaria control 180ff
DEET
  toxic effects 9
deltamethrin (L) 82
denaturing gradient gel electrophoresis 462ff
dermatophilosis
  Amblyomma variegatum in 295ff
  immune responses 297ff
  immunity 295ff
Dermatophilus congolensis
  protective immune mechanisms 253ff, 256, 295ff
  vaccine development 299
developmental switch
  Strongyloides ratti 231ff
diagnostics
  statistical classifiers 201ff
diamidines
  resistance 136ff
dihydrofolate reductase
  Plasmodium falciparum 131ff
dihydrofolate reductase-thymidylate synthase genes 397

dihydropteroate synthetase
Plasmodium falciparum 131ff
Dirofilaria immitis 386ff
Dirofilaria (Nochtiella) repens 386ff
dirofilariasis, human 386ff
differential diagnosis 388
immunology 387ff
DNA
enzymatically amplified fragments 462ff
museum species (L) 122
vaccines, malaria 92
dracunculiasis
eradication 127ff
drug resistance
antifolates 131, 132ff
arsenical–diamidine crossresistance 136ff
artemisinin 477
carbaryl 2
chloroquine 357ff, 360ff, 477
gastrointestinal nematodes 116ff
malaria 238ff, 356ff, 357ff, 360ff, (L) 466, 477
praziquantel 353ff
proguanil 477
sulfadoxine 131, 132ff
Trichostrongylus colubriformis 174
veterinary 323ff
vs tolerance 398
drug targets 393
thiol metabolism enzymes 404ff

E
echinococcosis, alveolar 315ff, 351ff
epidemiology 351
immunology 351ff
molecular biology 352
treatment 351
echinococcosis, cystic 172ff, 351ff
epidemiology 351
molecular biology 352
Echinococcus granulosus 172ff
Echinococcus multilocularis 315ff
control 317ff
education
teaching parasitology in Japan (L) 40
Ehrlichia
vaccine development 281ff
Eimeria tenella infection
zoite migration during 67ff
electron transport chain
Cryptosporidium parvum 335
emerging diseases 427
encephalitis
toxoplasmic 504ff
energy metabolism
Trypansomatidae (L) 346, (L) 347
Enterobius vermicularis
teeth grinding symptom 364
equine intestinal disease
tapeworms 156ff
Escherichia coli
genome project 88ff
evolution
molecular analysis of nematode diversity 188ff
phenotypic variability induced by parasites 28ff
Plasmodium falciparum (L) 38
trophic transmission 111ff
trypanosomes 432ff

F
Fansidar
Plasmodium falciparum 132ff
Filarial Genome Project 219ff
filarial infections
lymphatic *see* lymphatic filariasis
filarial nematodes
Genome Project 219ff
vascular system (L) 123
and *Wolbachia* 435ff
filariasis
control 85
immune response, *Wolbachia* and 441ff
lymphatic *see* lymphatic filariasis
molecular targets 305ff
frog deformities 364
funding
research and development 393
fungal infections
ecological impact (L) 509

G
Galton–Watson branching process 159ff
gastrointestinal nematodes
immunoepidemiology 246ff
vaccine development 116ff
Gender and Tropical Diseases Award 7ff
gene synteny
Plasmodium spp 178ff
genetic susceptibility
leishmaniasis 73ff
genital schistosomiasis 378ff
genome projects 88ff, 430ff
Brugia malayi 219ff, 306
Leishmania 225ff
Plasmodium falciparum 87, 211ff, 357
Wolbachia 428ff
genotyping
Anopheles gambiae 33ff
Cryptosporidium parvum (L) 80
giardiasis
as zoonosis 363
Giemsa staining
malaria speciation 423
glutathione–GR system
Plasmodium 406ff
glycolysis
increased, iNOS 460
glycosylphosphatidylinositol anchors 147ff
GTPases
in protozoan parasites 365ff
small *see* small G proteins
Guinea worm
eradication 127
Gyrodactylus salaris
identification 201ff

H
haemoglobin degradation
Plasmodium falciparum 356ff
Haemonchus contortus
vaccine development 116ff
Hammondia heydorni
identification 216
haptoglobin
action on trypanosome lytic factor (L) 251, (L) 252
head lice
drug resistance 1
heartwater
vaccine development 286ff, 290ff
heat shock proteins
Toxoplasma gondii 418ff
heavy metal pollution
parasites as accumulation indicators 16ff
helminths
archival, nucleotide sequences (L) 122
control, *Schistosoma japonicum* 170ff
epidemiology, attributable risk (L) 465
infections, albendazole 384
sparganosis (L) 124
HIV
Leishmania interaction 182ff
horses
intestinal disease due to tapeworms 156ff
host behaviour
parasites changing 397
host odour
infochemicals in mosquito host selection 409ff
host population density
species richness and (L) 208
human serum resistance
Trypanosoma brucei 43ff
hydatid disease
cystic echinococcosis 172ff

I
IDRC–TDR Gender and Tropical Diseases Award 7ff
imidothiazole
resistance 143ff
immune selection
population structure of pathogens 497ff
immunity
tick-borne diseases 253ff, 255ff
tick–host interaction 258ff
transmission-blocking 258ff
immunocytochemistry
schistosomiasis (L) 390
immunopathogenic mechanisms
Leishmania–HIV interaction 182ff
infochemicals
mosquito host selection 409ff
iNOS
increased glycolysis 460
induced by cytokines 458ff
pulmonary oedema 460
renal insufficiency 459ff
insecticides
resistance, head lice 1ff
'pour-on' (L) 82
interferon γ
Theileria annulata 11
toxoplasmosis 506
intracellular survival
protozoan parasites 22ff
intraepithelial lymphocytes
immunity to Coccidia 483ff
intravesicular pathogens 325ff
ion homeostasis
Plasmodium falciparum 198ff
iron acquisition
parasitic protozoa (L) 207
Plasmodium (L) 466

irrigation schemes
malaria prevention 394
ivermectin
lymphatic filariasis 382ff

K
kinases *see* protein kinases
kinetoplastida
genetic manipulation 372ff

L
Lagopus lagopus scoticus
population regulation 311ff
Legionella pneumophyla
macrophages harboring intravesicular pathogens 330ff
Leishmania
acidocalcisome 443ff
genetic manipulation of kinetoplastida 372ff
genome project 225ff
HIV interaction 182ff
macrophages harboring intravesicular pathogens 326ff
Montenegro skin test 135
survival inside macrophages 22ff
typing (L) 390
Leishmania braziliensis
tumour necrosis factor α 73ff
Leishmania (Leishmania) amazonensis
species identification (L) 81
Leishmania (Viannia) panamensis
species identification (L) 81
leishmaniasis
control 43, 431
cutaneous 342ff
mucocutaneous, tumour necrosis factor α 73ff
and volcanic activity 476
lice, head
drug resistance 1ff
livestock management
malaria prevention 394
lymphatic filariasis
albendazole 382ff
control 50

M
macrophages
harboring intravesicular pathogens 325ff
survival of protozoan parasites in 22
malaria
ancient 397
antifolates 131ff
apoptosis in blood-stage parasites 135
asymptomatic infection (L) 346
cerebral *see* cerebral malaria
chemotherapy costs 239ff
control 48ff
DDT 180ff
dipstick tests 92
distribution 99ff
drug resistance 238ff, 356ff, 357ff, 360ff, (L) 466
drug trials (L) 346
evolution (L) 39
genome project 87, 211ff, 357
immunity to *Plasmodium* asexual blood stages (L) 208
infochemicals in mosquito host selection 409ff
mortality 99ff, (L) 167, (L) 168
number of sporozoites inoculated per bite 9
origin (L) 39
pathogenesis 176ff
in pregnancy 177, 217
resistance (L) 208
rodent model 364
speciation 422ff
transmission 87, 99ff, 105ff
control (L) 466, 238ff
livestock management 394
vaccine development 47ff, 48ff, 92, 177ff, 217ff, (L) 348, 476ff
variant surface antigens 455ff
malathion
head lice control 2
Marisa cornuarietis
schistosomiasis control 395ff
Melanoides tuberculata
schistosomiasis control 395ff
microsatellite markers
Anopheles gambiae 33ff
milbemycin
resistance 141ff
molecular parasitology
trypanosomatids 469ff
Montenegro skin test 135
mosquitoes
bloodfeeding 314
host selection, infochemicals 409ff
in London Underground 9
number of sporozoites inoculated per bite 9
penetration of skin 92
reaction to bites 314
mucocutaneous leishmaniasis
tumour necrosis factor α 73ff
mucosal tissue
intraepithelial lymphocytes 483ff
museum species
nucleotide sequences (L) 122
mutation detection techniques
sequence analysis of DNA fragments 462ff
Mycobacterium
macrophages harboring intravesicular pathogens 330ff
Myxozoa, actinosporean stage 472ff, (L) 508

N
Na^+/H^+ antiporter
Plasmodium falciparum 360ff
Neisseria meningitidis
population structure 498ff
nematodes
control
proteinase inhibitors 414ff
transgenic plants 414ff
crystalloids 50
gatrointestinal, vaccine development 116ff
immunoepidemiology 246ff
internal pressure 218
molecular analysis of diversity 188ff
regulating *Lagopus* populations 311ff
vascular system (L) 123
Neospora caninum
epidemiology 216ff
life cycle 216
neurons
toxoplasmic infection 505ff
nitric oxide
cytokine-induced iNOS 458ff
Leishmania 344
model of cerebral malaria coma 459
Toxoplasma gondii 418
notifiable pathogens
statistical classifiers 201ff
nucleotide sequences
archival helminths (L) 122

O
oesophagostomiasis 129ff
Oesophagostomum bifurcum 129ff
onchocerciasis
molecular targets 305ff
operon
gene synteny across *Plasmodium* spp 178ff
opportunistic infections 45ff
ovoviviparity 50

P
parasitaemia
flow cytometry 93
parasite–host interaction
birds 4ff
parasite dispersal
by flight 4ff
pathogens
notifiable, identification 201ff
PCR, nested
detection of *Cryptosporidium parvum* (L) 345
phenotypic variability
induced by parasites 28ff
phylogenetics
molecular 188ff
trypanosomes 432ff
Plasmodium
asexual blood stages, immunity (L) 208
calcium homeostasis 488ff
cellular immunology 86
drug resistance 238ff, 356ff, 357ff, 360ff, (L) 466, 477
epidemiology 87
gene synteny 178ff
immunity mechanisms (L) 208
infochemicals in mosquito host selection 409ff
iron acquisition (L) 466
molecular genetics 86
protein kinases 449ff
protein trafficking 194ff, 356
transmission rates 87
Plasmodium chabaudi
calcium homeostasis 488ff
Plasmodium cynomolgi
in primates 9
Plasmodium falciparum
apicoplast as therapeutic target (L) 41, 5
calcium homeostasis 488ff
chloroquine action 357ff
circumsporozoite polymorphisms (L) 38
drug resistance 238ff, 356ff, 357ff, 360ff, (L) 466, 477
evolution (L) 38, (L) 39
folate effect 131, 133ff
genome project 87, 211ff, 357
glutathione–GR system 406ff
haemoglobin degradation 356ff

ion concentration measurements 198ff
life cycle 355ff
membrane transport 355
Na^+/H^+ antiporter 360ff
novel secretory pathways 235ff
and *P. vivax*, comparative pathology 458ff
point mutations 50
PP2 phosphatase family 90ff, (L) 124
probes for chromosome 4 50
protein glycosylation 147ff
proton trafficking 356
rodent model 364
selection 132ff
silent mutations (L) 38, (L) 39
synergy 132ff
transmission 99ff, 105ff
transmission control 238ff
transport processes 198ff
vaccine development 47ff
Plasmodium gallinaceum
culture 93
Plasmodium malariae
prevalence 422ff
Plasmodium ovale
prevalence 422ff
Plasmodium vivax
and *P. falciparum*, comparative pathology 458ff
Plasmodium yoelii nigeriensis
life cycle 93
Pneumocystis carinii
and AIDS 45ff
point mutations
Plasmodium falciparum 50
pollution
heavy metals, parasites as accumulation indicators 16ff
polymerase chain reaction (PCR)
microsatellite markers 33ff
population dynamics
nematode immunoepidemiology 246ff
parasites regulating wildlife populations 311ff
population genetics
Anopheles gambiae 33ff
Plasmodium falciparum (L) 38, (L) 39
'pour-on' insecticide, *Trypansoma brucei* (L) 82
PP2 phosphatase family 90, (L) 124
praziquantel 352ff
programmed cell death *see* apoptosis
proguanil
resistance 477
protein glycosylation
Plasmodium falciparum 147ff
protein kinases
Plasmodium 449ff
protein secretion
pathway 194ff, 235ff
protein trafficking
Plasmodium 194ff, 356
proteinase inhibitors
nematode control 414ff
protozoa
GTPases 365ff
iron acquisition (L) 207
PP2 phosphatase family 90, (L) 124
ribonucleotide reductase therapy 338ff
stage differentiation 241ff
pulmonary oedema, iNOS 460
pyrethroids
synthetic 1ff
pyrimethamine
Plasmodium falciparum 131, 132

R

Rab GTPases 365ff
renal insufficiency, iNOS 459ff
resistance *see* drug resistance
ribonucleotide reductase
antiparasite therapy 338ff
inhibition strategies 340ff
ribosomal RNA
as phylogenetic marker 189ff
ruminants
protective immune mechanisms to ticks 253ff, 255ff

S

Schistosoma japonicum 170ff
epidemiology 214ff
host–parasite relationships 214ff
Schistosoma mansoni
control of snail intermediate hosts 395ff
schistosomiasis
baboon 478ff
control 85, 395ff
diagnosis (L) 390
of female genital tract 378ff
immunocytochemistry (L) 390
morbidity markers 307ff
post-transmission 307ff
praziquantel 353ff
snail control 308
vaccine development (L) 165, (L) 166
SCID mice
human *Taenia* in 64ff
secretory pathway
Plasmodium proteins 194ff, 235ff
sequence analysis
enzymatically amplified DNA fragments 462ff
serine/threonine protein phosphatases 90ff
serum amyloid A
trypanosomiasis (L) 251, (L) 252
sex ratio
phenotypic, variation induced by parasites 28ff
simple sequence repeats
microsatellite markers 33ff
single-strand conformation
polymorphism 463ff
skin microflora
infochemicals in mosquito host selection 409ff
sleeping sickness 303ff
transmission 399ff
vaccine development 304
small G proteins 365ff
heterotrimeric 369
modifications as drug targets 369ff
sparganosis
role of arachidonic acid (L) 124
species richness
host population density (L) 208
spleen
in malaria and babesiosis 495
statistical classifiers
notifiable pathogens 201ff
stochastic model
stage differentiation in *Theileria annulata* 241ff
Strongyloides ratti
life cycle 231ff
subtelomeric variable open reading frame (STEVOR) 93
sulfadoxine
folate-dependent antagonism 131ff
symbiosis
Wolbachia 428ff, 435ff

T

Taenia
human, in SCID mice 64ff
taeniasis 64ff
tapeworms
intestinal disease in horses 156ff
taxonomy
Myxozoa 472ff, (L) 508
teeth grinding
Enterobius vermicularis 364
Theileria
PP2 phosphatase family 91
Theileria annulata
protective immune mechanisms 253ff, 256, 268ff
stochastic model of stage differentiation 241ff
subversion of immune responses to 10ff
Theileria parva
protective immune mechanisms 253ff, 256, 263ff
vaccine development 263ff
thiol metabolism
enzymes as drug targets 404ff
thioredoxin reductase
drug targets 407
tick-borne disease 314
control 258ff
immunology of tick–host interaction 258ff
protective immune mechanisms 253ff, 255ff
vaccine development 256ff
tick–host immunosuppression 258ff
ticks
control 258ff
protective immune mechanisms 253ff, 255ff
tolerance
and resistance 398
Toxoplasma gondii
acidocalcisome 443ff
and AIDS 45ff
apicoplast as therapeutic target 5ff, (L) 41
cytokines 418, 420ff
differential development in neural cells 504ff
infective forms 301ff
life cycle 301ff
survival inside macrophages 22ff
toxoplasmic retinochoroiditis 51ff
transmission 301ff
virulence and heat shock proteins 418ff
toxoplasmic encephalitis 504ff
toxoplasmic retinochoroiditis 51ff
toxoplasmosis
congenital 51ff
ocular 51ff

transgenic plants
nematode control 414ff
transmission, trophic
evolution of 111ff
transmission-blocking immunity
ticks 258ff
transmission strategies
Galton–Watson branching process 159ff
Trichomonas vaginalis
iron acquisition (L) 207
Trichostrongylus colubriformis
drug resistance 174
Trichostrongylus tenuis
regulating *Lagopus* populations 311ff
Tritrichomonas foetus
iron acquisition (L) 207
trophic transmission
evolution of 111ff
Trypanosoma
genetic manipulation of kinetoplastida 372ff
Trypanosoma brucei
acidocalcisome 443ff
control (L) 82
differentiation 76ff
genome organization 58
life cycle 76ff
mitosis 58
molecular evolution 432ff
nuclear organization 58
small G proteins 366ff
tsetse interactions 399ff
Trypanosoma brucei gambiense
control 303ff
vaccine development 304
Trypanosoma cruzi
acidocalcisome 443ff
etiology of infection 94ff
iron acquisition (L) 207
molecular evolution 432ff
selection (L) 466
survival inside macrophages 22ff
trypanosomatids
acidocalcisome 443ff
energy metabolism differences (L) 346, (L) 347
molecular parasitology 469ff
trypanosomes
apoptosis 401
lytic factor, haptoglobin action on (L) 251, (L) 252
molecular evolution 432ff
tsetse interactions 399ff
trypanosomiasis 476
acute phase response (L) 251, (L) 252
arsenical–diamidine crossresistance 136ff
control 43, (L) 82
sterile insect technique 135
transmission 313
trypanothione reductase
drug targets 404ff
tsetse
control 303
sterile insect technique 135

tumour necrosis factor α
in mucocutaneous leishmaniasis 73ff
toxoplasmosis 506

V
vaccine development
Anaplasma marginale 281ff
Babesia bigemina 275ff
Babesia bovis 275ff
Cowdria ruminantium 286ff, 290ff
cysticercosis 64ff
Dermatophilus congolensis 299
Ehrlichia 290ff
gastrointestinal nematodes 116ff
Haemonchus contortus 116ff
heartwater 290ff
'hidden antigens' 116ff
malaria 47ff, 48ff, 92, 177ff, 217ff, (L) 348, 476ff
schistosomiasis (L) 165, (L) 166
Theileria parva 263ff
tick-borne diseases 256ff
Trypanosoma brucei gambiense 304
veterinary 322ff
veterinary parasitology 320ff, 471
virulence
genes for 474
nature of 474ff
visceral leishmaniasis 431

W
wildlife populations
impact of fungal infections (L) 509
parasites regulating 311ff
Wolbachia
and filarial nematodes 437ff
genome project 89, 428ff
symbiosis 437ff

Z
zoite migration
in *Eimeria tenella* infection 67ff
zoonoses
giardiasis as 363
veterinary public health 320
West Africa 309ff
